SoftBank

Introduction

Thank you for purchasing SoftBank 822P.

● For proper handset use, read User Guide (this manual) and First Step Guide.

● Please keep this manual in a safe place for future reference.

● Accessible services may vary by service area, subscription, etc.

SoftBank 822P is compatible with both 3G and GSM network technologies.

Note

● Unauthorized copying of any part of this manual is prohibited.

● Manual content is subject to change without prior notice.

● Efforts have been made to ensure the accuracy and clarity of this manual. Please contact SoftBank Customer Center, General Information (☞P.17-42) about unclear or missing information.

User Guide (Japanese), First Step Guide and Raku Raku Start Book (Japanese) are included with 822P. The function of each manual is as follows.
● First Step Guide/Raku Raku Start Book: Basic instructions.
● User Guide: Detailed instructions.
● Tsukaikonashi Dokuhon (Japanese): Online advanced instructions.

Handset, Battery & Charger (Sold Separately)

⚠ Danger

! Use specified battery and charger only.
The use of devices other than those specified may result in malfunction of handset or battery. Leaking, overheating, explosion or fire may occur.

⊘ Do not get handset, battery and charger wet.
If liquids such as water or pet urine get into battery and charger, they may cause overheating, electric shock or malfunction. Do not use handset in damp places like bathrooms.

⊘ Do not disassemble or modify handset.
May cause accidents such as fire, bodily injury, electric shock or equipment malfunction.

⚠ Warning

⊘ Do not place handset, battery or charger inside cooking appliances, such as microwave ovens or high-pressure containers.
Battery may leak, overheat, explode or catch fire, and handset and charger may overheat, emit smoke or catch fire. The internal circuit may also be damaged.

⊘ Do not throw or otherwise subject to strong force or impacts.
Battery may leak, overheat, explode, catch fire, or cause damage to handset.

⊘ Keep handset off and charger disconnected in filling stations or places where flammable gas is generated.
Handset use in such areas may lead to fire.

! If battery does not charge after specified time, stop charging.
Battery may leak, overheat, explode or catch fire.

⚠ Caution

⊘ Do not use or leave handset or related hardware in locations subject to high temperatures, such as near an open flame/heater, in sunlight or inside a car on an extremely hot day.
Do not charge, leave, use, or be carrying handset or related hardware in a warm place or where heat collects, such as under a kotatsu (blanketed warming table) or electric blanket, next to a kairo (worn warming patch), etc.
Battery may leak, overheat, explode, or ignite. Handset or related hardware may deform or malfunction. Part of the casing may also become hot and cause burns.

⊘ Do not use handset in dusty places.
May hinder heat release, or cause burnout or fire.

! Keep handset out of the reach of young children.
May result in electric shock or bodily injury.

If for use by child, guardian should teach proper handling and ensure handset is used as directed.
May result in bodily injury.

Battery

<div align="center">⚠ Danger</div>

See battery label to confirm battery type.

Label	Battery Type

Do not throw battery into fire.
Battery may leak, overheat, explode or catch fire.

Do not pierce battery with a nail or other sharp object, hit it with a hammer, or step on it.
Battery may leak, overheat, explode or catch fire.

Do not use excessive force to attach battery to handset even when you cannot attach it successfully.
Battery may be the wrong way around.
Battery may leak, overheat, explode or catch fire.

Do not touch terminals with metallic objects or carry/store battery with metal jewelry, etc.
Battery may leak, overheat, explode or catch fire.

If battery fluid gets into eyes, do not rub; flush with clean water and see a doctor immediately.
Failure to do so may cause blindness.

<div align="center">⚠ Warning</div>

If battery leaks or emits an unusual odor, immediately stop use and move it away as far as possible from any flame or fire.
Battery fluid is flammable and could ignite, causing fire or explosion.

If battery leaks or emits an unusual odor, immediately remove it away from handset.
Battery may leak, overheat, explode or catch fire.

If battery fluid comes into contact with your skin or clothing, stop using handset immediately and rinse it off with clean water.
Battery fluid is harmful to your skin.

<div align="center">⚠ Caution</div>

Do not dispose of battery with ordinary refuse.
May cause fire and environmental damage. Place tape over the terminals to insulate battery, and take it to a SoftBank retailer or institution that handles used batteries in your area.

Handset

⚠ **Warning**

🚫 **Do not use handset while driving a vehicle.**
Doing so may interfere with safe driving and cause an accident. Stop your vehicle to park in a safe place before using handset. Drivers using handsets while driving are subject to prosecution.

❗ **Turn off handset near high-precision electronic devices or devices using weak electronic signals.**
Handset may possibly cause these devices to malfunction.
*Electronic devices that may be affected: Hearing aids, implantable cardiac pacemakers, implantable cardioverter defibrillators, other medical electronic devices, fire alarms, automatic doors and other automatically controlled devices.Persons using an implantable cardiac pacemaker or cardioverter defibrillator, or other electronic medical devices, should consult the device manufacturer or vendor for advice on possible radio wave effects.

❗ **Turn off handset where use is prohibited, such as aboard aircraft or in hospitals.**
Handset may interfere with the operation of sensitive devices and electronic medical equipment.
Follow the instructions given by the respective medical facilities regarding the use of mobile phones on their premises. In addition, actions such as speaking on a mobile phone aboard aircraft are prohibited and may be punishable by law.

🚫 **If you are using electronic medical equipment, do not put handset in your breast pocket or in the inside pocket of your jacket.**
Using handset in close proximity to electronic medical equipment may cause the equipment to malfunction.

❗ **If you have a weak heart, take extra precautions when setting functions such as vibration or ringer volume for incoming transmissions.**

🚫 **Do not aim the infrared port at eyes when using infrared communication.**
Doing so may affect eyes. Also, aiming it towards other infrared devices may interfere with the operation of these devices.

❗ **In a thunderstorm, immediately turn off handset and seek shelter.**
There is a risk of being struck by lightning and suffering electric shock.

⚠ Caution

⚠ Handset may become hot while in use. Avoid prolonged skin contact that may result in burns.

🚫 **If handset affects car electronics, stop use.**
Handset use may affect electronics in some models. In this case, stop use; could impede safe driving.

🚫 Do not place your ear too close to the speaker while ringer sounds or sound files play.
May impair hearing.

⚠ **Do not turn up the volume unnecessarily high when using headphones.**
Using headphones with volume turned up for an extended period may impair hearing or injure ears.

⚠ Handset use may cause itching, rashes, eczema or other symptoms depending on the user's physical condition. In this case, immediately stop use and seek medical treatment.

🚫 **Do not place a magnetic card near or in handset.**
The stored magnetic data in cash cards, credit cards, telephone cards and floppy disks, etc. may be erased.

🚫 **Do not swing handset by its strap, etc.**
Handset may strike you or others resulting in injury or damage to handset or other property.

Charger (Sold Separately)

⚠ Warning

Place charger on a stable surface during charging. Do not cover or wrap charger.
May cause overheating, fire or malfunction.

Do not handle charger with wet hands.
May result in electric shock or malfunction.

Always use the specified power supply/voltage.
Using incorrect voltage may cause malfunction/fire.
AC Charger: AC100V-240V
In-Car Charger: DC12V, 24V
(vehicles with a negative earth only)

Do not use handset/charger in thunderstorms.
There is a risk of being struck by lightning and suffering electric shock.

Do not short-circuit charging terminals.
May result in fire, electric shock, equipment malfunction or bodily injury.

Use In-Car Charger in vehicles with a negative (-) earth. Do not use In-Car Charger if vehicle has a positive (+) earth.
May cause fire.

Unplug AC Charger during periods of disuse.
May cause electric shock, fire or malfunction.

If In-Car Charger fuse blows, always replace it with specified fuse.
Using the incorrect fuse may cause fire or malfunction. Refer to the respective manuals for information on the correct fuse specifications.

If liquid such as water or pet urine get into charger, unplug it immediately.
May cause electric shock, smoke emission or fire.

Wipe off any dust on the plug.
May cause fire.

⚠ Caution

Always unplug charger before cleaning it.
May result in electric shock.

Pull charger (not cord) to unplug charger.
Pulling on the cord may damage the cord and cause electric shock or fire.

Do not charge battery if it is wet.
May cause battery to overheat, catch fire or explode.

Near Electronic Medical Equipment

⚠ **Warning**

This section is based on "Guidelines on the Use of Radio Communications Equipment such as Cellular Telephones and Safeguards for Electronic Medical Equipment" (Electromagnetic Compatibility Conference, April 1997) and "Report of Investigation of the Effects of Radio Waves on Medical Equipment, etc." (Association of Radio Industries and Businesses, March 2001).

If you use an implantable cardiac pacemaker or cardioverter defibrillator, keep handset more than 22cm away from the implant at all times.
Handset radio waves may affect implantable cardiac pacemaker or cardioverter defibrillator operations.

Observe the following in medical facilities.
- Do not take handset into operating rooms, Intensive Care Units or Coronary Care Units.
- Turn off handset inside hospital wards.
- Turn off handset even outside hospital wards (in hospital lobbies, etc.); electronic medical equipment may be in use nearby.
- Where a medical facility has specific instructions prohibiting the carrying and use of mobile phones, observe those instructions strictly.

Turn off handset in crowded places such as rush hour trains; implantable cardiac pacemakers or cardioverter defibrillators may be in use nearby.
Handset radio waves may affect implantable cardiac pacemaker or cardioverter defibrillator operations.

Persons using electronic medical equipment outside medical facilities should consult the vendor about possible radio wave effects.

Handling Precautions

General Notes

- SoftBank is not liable for damages from accidental loss/ alteration of handset/Memory Card information (Phone Book entries, images/sound files, etc.). Back-up important information.
- Handset transmissions may be disrupted inside buildings, tunnels or underground, or when moving into/out of such places.
- Use handset without disturbing others.
- Handsets are radios as stipulated by the Radio Law. Under the Radio Law, handsets must be submitted for inspection upon request.
- Handset use near landlines, TVs or radios may cause interference.
- Read Memory Card manual beforehand for proper use.
- Beware of eavesdropping.
  Digital signals reduce interception, however transmissions may be overheard. Deliberate/accidental interception of communications constitutes eavesdropping.
  "eavesdropping" means radio communication is received by another receiver deliberately or accidentally.

Electromagnetic Waves

- For body worn operation, this mobile phone has been tested and meets RF exposure guidelines when used with an accessory containing no metal and positioning the handset a minimum 15mm from the body. Use of other accessories may not ensure compliance with RF exposure guidelines.

FCC Notice

- This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:
  (1) This device may not cause harmful interference, and
  (2) this device must accept any interference received, including interference that may cause undesired operation.
- Changes or modifications not expressly approved by the manufacturer responsible for compliance could void the user's authority to operate the equipment.

FCC RF Exposure Information

Your handset is a radio transmitter and receiver. It is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission of the U.S. Government.
The guidelines are based on standards that were developed by independent scientific organisations through periodic and thorough evaluation of scientific studies. The standards include a

substantial safety margin designed to assure the safety of all persons, regardless of age and health.

The exposure standard for wireless handsets employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6W/kg. The tests are performed in positions and locations (e.g. at the ear and worn on the body) as required by the FCC for each model.

The highest SAR value for this model handset when tested for use at the ear is 0.643 W/kg and when worn on the body, as described in this user guide, is 0.334 W/kg.

Body-worn Operation; This device was tested for typical body-worn operations with the back of the handset kept 1.5 cm from the body. To maintain compliance with FCC RF exposure requirements, use accessories that maintain a 1.5 cm separation distance between the user's body and the back of the handset. The use of beltclips, holsters and similar accessories should not contain metallic components in its assembly.

The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided. The FCC has granted an Equipment Authorisation for this model handset with all reported SAR levels evaluated as in compliance with the FCC RF emission guidelines. SAR information on this model handset is on file with the FCC and can be found under the Display Grant section of http://www.fcc.gov/oet/fccid after searching on FCC ID UCE207005A. Additional information on Specific Absorption Rates (SAR) can be found on the Cellular Telecommunications & Internet Association (CTIA) website at http://www.phonefacts.net.

European RF Exposure Information

Your mobile device is a radio transmitter and receiver. It is designed not to exceed the limits for exposure to radio waves recommended by international guidelines. These guidelines were developed by the independent scientific organization ICNIRP and include safety margins designed to assure the protection of all persons, regardless of age and health.

The guidelines use a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit for mobile devices is 2 W/kg and the highest SAR value for this device when tested at the ear was 0.867 W/kg*. As mobile devices offer a range of functions, they can be used in other positions, such as on the body as described in this user guide**. In this case, the highest tested SAR value is 0.549 W/kg. As SAR is measured utilizing the devices highest transmitting power the actual SAR of this device while operating is typically below that indicated above. This is due to automatic changes to the power level of the device to ensure it only uses the minimum level required to reach the network.The World Health Organization has stated that present scientific information does not indicate the need for any special precautions for the use of mobile devices. They note that if you want to reduce your exposure then you can do so by limiting the length of calls or using a hands-free device to keep the mobile phone away from the head and body.

*The tests are carried out in accordance with international guidelines for testing.
** Please see Electromagnetic Waves on page xx for important notes regarding body worn operation.

Declaration of Conformity

$C\epsilon0168$

We, Panasonic Mobile Communications Development of Europe Ltd., declare that SoftBank 822P conforms with the essential and other relevant requirements of the directive 1999/5/EC.
A declaration of conformity to this effect can be found at **http://panasonic.co.jp/pmc/products/en/support/index.html**

- This product is only intended for sale in Japan.
- Compliance to the European RTTE directive applies to: SoftBank 822P handset, Battery (PMBAE1) and AC Charger (SoftBank ZTDAA1).

Handset Care

- If handset is left with no battery or an exhausted one, data may be altered/lost. SoftBank is not liable for any resulting damages.
- Use handset within temperatures of 5°C to 35°C and humidity 35% to 85%. Avoid extreme temperatures/direct sunlight.
- Handset may become warm during use or charging. This is not malfunction.
- Exposing lens to direct sunlight may damage color filter and affect image color.

- Soiled terminals may cause poor connection. If the terminals are dirty, use a dry cloth or cotton swab to wipe them clean.
- Clean handset with dry, soft cloth. Using alcohol, thinner, etc. may damage it.
- Avoid forceful rubbing or scratching handset display.
- 822P is not waterproof. Avoid exposure to liquids and high humidity.
  - Do not expose handset to precipitation.
  - Air conditioned air may condense causing corrosion.
  - Do not put handset in damp places like bathrooms.
  - On the beach, keep handset away from sun and surf.
  - Perspiration in handset may cause malfunction.
- Do not subject handset to excessive force.
  - Do not sit down with handset in a back pocket.
  - Do not place heavy objects on handset in a bag.
- Do not remove nameplate; doing so invalidates warranty.
- Always turn off handset before removing battery. If battery is removed while saving or sending mail, data may be altered or lost.
- LCD is manufactured with high precision technology, however, some pixels may appear darker/brighter.
- Connect only specified products to Earphone Port.
- Keep USIM Card out of the reach of young children. If swallowed, see a doctor immediately.
- While walking, moderate headphone volume to make sounds around you audible and help avoid accidents.
- When holding handset in use, do not cover Speaker.

Mobile Camera

● Be sure to observe proper etiquette when using the camera.
● Do not expose the camera lens to direct sunlight. Concentrated sunlight through the lens may cause the handset to malfunction.
● Be sure to try taking and previewing pictures before using the camera on important occasions like wedding ceremonies.
● Do not commercially use or transfer pictures taken with the camera without the permission of the copyright holder (photographer), except for personal use.
● Do not use the camera in locations where taking photos and recording videos are prohibited.

Function Usage Limits

These functions are disabled after handset replacement/upgrade or service cancellation: Camera; Media Player; S! Applications.
After a period of disuse, these functions may become unusable.

Copyrights and Others

Right of Portrait

Portrait right is the right of an individual to refuse to be photographed by others and protects from the unauthorized publication or use of an individual's photograph by others. Right of personality is a portrait right applicable to all citizens and right of publicity is a portrait right (property right) designed to protect celebrities' interests. Be careful when taking pictures with the handset camera. Photographing, publicizing and distributing photographs of citizens and celebrities without permission are illegal.

Copyrights

Sounds, images, computer programs, databases, other copyrighted materials, their respective works and copyright holders are protected by copyright laws. Duplicated materials are limited to private use only. If duplications (including conversion of data types), modifications, transfer of duplicates or distribution on networks are made without permission of copyright holders, this constitutes "Literary Piracy" and "Infringement of Copyright Holder Rights" and a criminal action for reparations and criminal punishment may be filed. If duplicates are made using handset, please observe the copyright laws. Materials captured with handset camera are also subject to the above.

822P meets the government's requirements for exposure to radio waves.

These requirements are based on scientific basis to assure that radio waves emitted from mobile phones and other handheld wireless devices do not affect human health. They require that the Specific Absorption Rate (SAR), which is the unit of measurement for the amount of radiofrequency absorbed by the body, shall not exceed 2 W/kg*. This limit includes a substantial safety margin designed to assure the safety of all persons, regardless of age or health, and meets the international standard set by International Commission on Non-Ionizing Radiation Protection (ICNIRP) in cooperation with World Health Organization (WHO).

The highest SAR value for 822P is 0.867 W/kg. Tests for SAR are conducted with handset transmitting at its highest certified power level, and follow the testing methods set by the government. While there may be differences between the SAR levels for various handsets, they all meet the governmental requirements for safe exposure. The actual SAR level of the handset while operating can be well below the highest value. This is because the handset is designed to operate at multiple power levels so as to use only the power required to reach the Network.

Additional information on SAR can be obtained on the following Websites:
Ministry of Internal Affairs and Communications (Protection from Radio Wave Environment)
http://www.tele.soumu.go.jp/e/ele/index.htm
Association of Radio Industries and Businesses (ARIB)
http://www.arib-emf.org/index02.html (Japanese only)

* Requirements are stipulated in Radio Law (Ordinance Regulating Radio Equipment, Article 14-2).

Getting Started

USIM Card

About USIM Card

Universal Subscriber Identity Module (USIM) Card is an IC card containing customer and authentication information, including handset number, and limited Phone Book entry and SMS message storage. USIM must be inserted to use 822P or Network services (calling, messaging, Internet, etc.).
Turn handset off before inserting/removing USIM Card.

● Insert USIM Card into other compatible SoftBank handset to use information saved on USIM Card.
● Use SoftBank specified USIM Card only; non-specified USIM Cards may not function properly.
● Do not insert USIM Card into other IC card devices. SoftBank is not liable for any resulting damages.
● Keep IC portion clean.
● Do not damage, carelessly touch or short-circuit IC chip; doing so may result in loss of data or malfunction.
● Remove dust/debris with a soft, dry cloth.
● Do not place labels, etc. on USIM Card; may cause failure.

IC
USIM Card

● If 822P is dropped/subjected to shock, *Restarting USIM Please wait* may appear; 822P returns to Standby. This is not malfunction. If *Insert USIM* appears, re-insert USIM Card properly then restart 822P.

Important

● USIM Card is the property of SoftBank.
● Return USIM Card to SoftBank upon service cancellation.
● USIM Card will be reissued for a fee if lost or damaged.
● If USIM Card/822P with USIM Card inserted is lost or stolen, contact SoftBank Customer Center or Global Call Center (ｇP.17-42).
● Back up USIM Card files. SoftBank is not liable for lost files.
● USIM Card specifications/performance may change without prior notice.
● Pre-installed S! Applications (BookSurfing®, Near Chat, etc.) may be unusable while a different or replacement USIM Card is inserted into 822P.
● Returned USIM Cards are recycled.

Note Some downloaded files may be inaccessible after upgrades/ repairs, USIM Card/handset replacement.

USIM Card Installation

● Remove battery (☞P.1-12) then follow steps below.

Inserting

1 USIM Holder
Open

2 Notch

3 Close

Insert USIM Card here
1 Open USIM Holder

2 Insert USIM Card (gold IC facing down) as shown

3 Close USIM Holder

● Press cover until it clicks shut.

Removing

1 To open Holder, follow Step 1 for inserting USIM Card (☞Left), then slide out USIM Card gently

Note
● Do not force USIM Card into or out of 822P; may damage handset/USIM Card.
● Be careful not to lose the removed USIM Card.
● Avoid touching USIM Card terminals or IC chip; doing so may hinder performance/USIM Card recognition.
● Do not open/close USIM Holder by force; doing so may damage USIM Card.

USIM PINs

There are two USIM Card security codes: *PIN1* & *PIN2*.

PIN1

<Default> 9999

4 to 8-digit code used to prevent unauthorized 822P use.
● PIN1 can be changed (⤢P.10-3).
● When PIN Entry is *ON* (⤢P.10-2), PIN1 entry is required each time 822P is turned on (with USIM Card inserted).

> Note When PIN Entry is *ON* (⤢P.10-2):
> ● Signal Indicator may take some time to appear in Standby after entering PIN1.
> ● Enter PIN1 to dial emergency numbers (110, 119, 118).

PIN2

<Default> 9999

Required to clear All Calls or set Cost Limit and Currency Setting (⤢P.16-9).
● PIN2 can be changed (⤢P.10-3).

PIN Lock & Cancellation (PUK)

PIN1 Lock or PIN2 Lock is activated if PIN1 or PIN2 is incorrectly entered three times. Cancel PIN1 Lock or PIN2 Lock by entering the PIN Unblocking Key (PUK1/PUK2) (⤢P.10-3).
● For information on PUK, contact SoftBank Customer Center, General Information (⤢P.17-42).

> Note ● If PUK is incorrectly entered ten times, USIM Card is locked and handset is disabled. Write down PUK.
> ● For procedures required to unlock USIM Card, contact SoftBank Customer Center, General Information (⤢P.17-42).

About Battery

Before Charging

Charge battery before use or after a period of disuse (AC Charger sold separately).

Charging Time & Operating Time Estimates

		3G Mode	**GSM Mode**
Charging Time		130 minutes*	
Standby Time		400 hours*	300 hours*
Talk Time	**Voice Call**	200 minutes*	
	Video Call	90 minutes*	–

* Approximate value

● 3G Mode/GSM Mode: ⟨テ P.2-12
● Talk Time is an average measured with a new, fully charged battery, with stable signals.
● Standby Time is an average measured with a new, fully charged battery, without calls or operations, in Standby with stable signals.
● Talk Time and Standby Time may vary by environment (battery status, temperature, etc.).

About Battery

● Clean 822P, battery & charger with dry cotton swab.
● Replace battery if operating time shortens noticeably.
● Charge battery at least once every six months.
● Use a case when carrying battery separately.

Charging

● Battery must be installed to charge it.
● It may take longer for charging when handset is on.
● Move charger away from TV/radio if interference occurs.

Battery Time

● Using handset in poor conditions may shorten battery time.
  • Extreme temperatures
  • Impaired handset, battery or Charging Terminals
  • Signal is weak/handset is out-of-range
  • 822P is left mid-operation (not in Standby)
  • Playing music or using S! Appli, etc.
● Extending battery time
  Example:
  • Select shorter display backlight time (🖝 P.16-3).
  • Select *Silent* for Key Tone Volume (🖝 P.16-3) and *OFF* or shorter time for Keypad Backlight (🖝 P.16-7).

When Battery Runs Out

● Unless a Call is in Progress
  A message appears and warning tone sounds. Warning tone ends automatically after two minutes; press 📟, ⬛ or ⬛ to cancel warning tone manually. Charge or replace battery.
  • If Manner mode is active/Warning Tone *Off*, nothing sounds.

● During a Call
  A message appears and warning tone sounds via Earpiece or Speaker. After 90 seconds, call ends and 822P shuts down in 30 seconds. Charge or replace battery.

Battery Strength Indicator

● Battery Strength indicator changes as remaining usage time decreases. Charge or replace battery when battery level is low (🖝 P.1-8) or a message appears on Display.

Battery Voltage

Low battery warning message appears. Charge or replace battery immediately.

Emergency Positioning Request

When an emergency call is made from a mobile phone, location is reported to first response agencies such as the police.
- Location information may be inaccurate due to location or signal conditions. Describe location or nearby landmarks.
- Base Station Positioning System is accurate within 100 meters to 10 kilometers. Location information from distant base stations may be inaccurate.
- Function available where first response agencies have completed system installation.
- Dialing 184 before 110, 118 or 119, cancels location report. However, first responders may obtain location information for immediate and serious threats to life.
- Not available for international roaming.
- Requires no separate subscription or communication fees.

Note
Emergency numbers may not be dialable outside Japan depending on the network available or handset settings.

Memory Card

822P is compatible with microSD Card.

● microSD Card is referred to as Memory Card.
● 822P is compatible with up to 2GB Memory Cards.
(Compatibilities of Panasonic 2GB, Toshiba 2GB and SanDisk
2GB Memory Cards tested and confirmed as of November
2007). Memory Card compatibility is not guaranteed.
● Format new Memory Cards for use with 822P (☞P.8-17).

> **Note** ● SoftBank is not liable for damages from accidental loss/
> alteration of Memory Card information. Keep a copy of
> Phone Book entries, etc. in a separate place.
> ● microSD Card has no write protect feature; there is a risk
> of accidental erasure/overwriting of files.
> ● Actual Memory Card capacity is lower than indicated due
> to system files and temporary files.

Memory Card Installation

● Turn off handset before inserting/removing Memory Card.

Inserting

1 Open cover. Insert Memory Card until it clicks

● 822P cannot format Incompatible Memory Cards.

● If format fails, turn power off and remove Memory Card from 822P. Reinsert Memory Card and format it again.
</blockquote>

Viewing Memory Card Files

View files in Memory Card from Data Folder. To toggle memory views, see "Viewing Data Folder" (ZP.8-4).

Note
● View up to 1000 Memory Card files/folders on 822P. To view hidden Memory Card files/folders, delete files, then turn 822P power off and restart it. Previously hidden files appear in equal number to those that were deleted.
● Files with names over 32 alphanumerics/extensions over six alphanumerics cannot be viewed.
● Unsupported files cannot be viewed.

Phone Data Backup

Back up Phone data to Memory Card; restore Phone data after accidental loss/alteration.

Backup Files

Phone Book	Back up Phone Book. ● All Phone Book entries can be saved regardless of Secret mode settings. ● Settings such as Ringtone, Notification Light, Picture cannot be backed up/restored.
Messages	Back up messages in Incoming Mail, Draft, Sent/Unsent Messages folders. ● The initial portion of S! Mail messages are restored as complete S! Mail messages, and complete message retrieval is invalidated. ● Mail Delivery Rule can not be backed up/restored in Incoming Mail. All restored messages from Memory Card are stored to Received folder.

Calendar	Back up Schedule entries. ● Settings such as Schedule Tone, Notification Light cannot be backed up/restored. ● Schedule entries that cannot be saved on handset (rP.11-3) cannot be restored. ● Schedule entries that date/time are not specified cannot be restored.
Bookmarks	Back up Yahoo! Keitai and PC Site Browser bookmarks.
Content Keys	Back up downloaded Content Keys. ● Content Keys with expiration dates or usage limits cannot be moved to Memory Card. ● Some applications are made for use on specific models. Contact SoftBank Customer Center, General Information (rP.17-42) for more information. ● USIM Card inserted when Content Keys were moved to Memory Card must be inserted to move Content Keys from Memory Card. ● After moving Content Keys to Memory Card, files requiring Content Keys cannot be opened. Move Content Keys from Memory Card to use them. ● Content Keys are backed up after the previous back up file is deleted. To back up Content Keys obtained after the first backup, perform **Move to Phone** before the second backup.

Notes

● Backup is not available when battery is low. Change/charge battery before backup.
● Backup/restoration activates Offline mode. When backup/restoration starts in Offline mode, Offline mode is not canceled automatically even when backup/restoration is complete.
● When restoring files other than Content Keys from Memory Card, the same type files are all deleted from handset before restoration. Back up files saved on 822P beforehand.
● Depending on contents, Phone Book/Schedule entries, messages or bookmarks may not be backed up/restored, or may be altered beyond the parameters.
● Backup files created on other SoftBank handsets may not be restored or usable on 822P.

Infrared

Before Using Infrared

Transfer Phone Book/Schedule entries, messages, bookmarks and Data Folder files wirelessly between 822P and compatible devices, including PCs and other mobiles.

● 822P infrared function is based on IrMC1.1, however, some IrMC1.1-based device transmissions may not be transmitted/ received within specification.

Transferable Files

Phone Book Entries	Transfer one entry at a time or all at once ● Ringtone, Notification Light, Picture and other entry settings are lost in transfers. Group, Secret Setting and other entry settings are also lost when one entry is transferred.
Schedule Entries	Transfer one entry at a time ● Schedule Tone, Alarm, Notification Light and other entry settings are lost in transfers. ● Entries with date/time that cannot be set on 822P are not saved (£P.11-3). ● Entries without specified date/time cannot be received.
Data Folder Files	Transfer one file at a time ● Copy protected files may not transfer.
Messages	Transfer one message at a time ● Messages in Incoming Mail, Draft, Sent Messages and Unsent Messages folders can be transferred.
Bookmarks	Transfer one bookmark at a time

Note
● Depending on their content, some incoming Phone Book/ Schedule entries, messages or bookmarks may not be received, or may be altered beyond the parameters listed left.
● If memory becomes full, remaining entries are truncated. (Memory List: £P.17-32)
● Images captured by 822P Camera may rotate 90° on cross-carrier handsets or PC.

Notes

- Debris may inhibit infrared transfers; clean infrared ports with a soft cloth beforehand.
- Direct sunlight/fluorescent light may inhibit transfers.
- Infrared transfers are disabled while sending/receiving messages or using Internet.
- When data transfer is interrupted, it may take some time for process to complete.
- Align infrared ports within 20 cm of one another and make sure no object are placed between them. Do not move the devices until transfer is complete.

Notes

● 822P may not be able to establish a Bluetooth® connection
  with some Bluetooth® devices.

● Establish connections with certified Bluetooth® devices that
  meet the specification standards developed by Bluetooth SIG.

● Due to the unique characteristics/specifications of a certified
  Bluetooth® device, connections or transfers may fail;
  procedures, displayed results or operations may vary from
  those described in the manual.

● When data transfer is interrupted, it may take some time for
  process to complete.

● Noise may interfere with wireless or handsfree conversations
  depending on the status of connected devices or signal
  conditions.

● 🖥 appears when communicating with handsfree devices.
  However, there are no icons indicating that 822P is
  communicating with other Bluetooth® devices.

● For details about headset/handsfree devices, see the device

Troubleshooting

Problem	Causes and Remedies
822P does not turn on	• Was ⊞⌑ pressed for more than three seconds? • Is battery level sufficient? • Is battery inserted properly? (☞P.1-12)
Handset functions do not work after turning power on	• Does PIN Entry window appear? PIN Entry is **ON**. Enter PIN1 (☞P.10-2).
Insert USIM or *Invalid USIM* appears when 822P is turned on or operations attempted	• Is USIM Card inserted correctly? (☞P.1-3) • Unusable USIM Card may be inserted (☞P.1-2). • USIM Card IC chip may be dirty. Wipe with a clean cloth, then insert USIM Card correctly.
Display does not illuminate	• Is Keyguard active? (☞P.10-4) Press ⊡ or ⊞⌑ to activate Display Backlight, then cancel Keyguard. • Is 822P turned on? Press and hold ⊞⌑ for 3+ seconds.
Keypad does not respond	• Does 🔒 appear in Standby? Keyguard is activated (☞P.10-4). Press ⊡ to unlock it. • Does 🔒 appear in Standby? Password Lock is active (☞P.10-5). Enter 4-digit Handset Code (☞P.1-23) to release it. • Does 🔒/🔒 appear in Standby? Keyguard and Password Lock are both active (☞P.10-4). Cancel Keyguard, and then cancel Password Lock.

Problem	Causes and Remedies
Calls or Video Calls cannot be connected or message and Internet connections are not available	• Does 🔲 appear? Is 822P out-of-range or in a location where signal is weak? Move to a location where signal is strong. • Are you using handset overseas? You must select an operator and set international settings to use handset abroad (🔾P.2-12). • Does 🔲 appear? (🔾P.2-15) • Does 🔲 (appears in red) appear? (🔾P.1-8) • Does 🔲 or 🔲 appear? Messaging Lock is active. Deactivate Messaging Lock.
Calls or Video Calls cannot be connected	• Is area code entered? • Is restricting outgoing calls in Call Barring? (🔾P.17-6)
Calls cannot be connected or busy signal sounds after dialing	• Did you enter area code?
Calls cannot be made via a Phone Book entry	• Entry may be saved as Secret. Set Secret Mode *ON* (🔾P.10-8). • Does 🔲 or 🔲 appear? Phone Book Lock is active. Deactivate Phone Book Lock.
Entry names do not appear in Call Log or message lists even if saved in Phone Book	• This may occur just after turning 822P on. Return to Standby and retry later.
Handset does not respond as customized for incoming calls from numbers saved in Phone Book	• This may occur just after turning 822P on.
Call is interrupted or disconnected	• Does 🔲 appear? Is 822P out-of-range or in a location where signal is weak? Move to a location where signal is strong.

Problem	Causes and Remedies
Cannot charge battery	• Is AC Charger (sold separately) firmly connected to 822P? (☞P.1-13) • Is AC Charger securely plugged into an outlet? • Is battery installed in 822P correctly? (☞P.1-12) • Make sure 822P, battery and AC Charger terminals are clean. • Battery may not charge beyond +5°C and +35°C. • Battery may need to be replaced.
822P/accessories feel warm	• AC Charger (sold separately) may warm during charging. 822P may warm during long use. This is normal if you can hold it comfortably. Low temperature burns may occur if 822P is held against skin for long periods.
Battery Operating Time is greatly reduced	• Battery Operating Time may be reduced by environmental factors such as temperature, charging conditions or signal strength, as well as by operations or settings. See "Charging Time & Operating Time Estimates" (☞P.1-10) and "Battery Time" (☞P.1-11).

Note If you did not find the remedy to your problem here, please contact SoftBank Customer Center (☞P.17-42).

Warning Signs

Problem	Causes and Remedies

Software Update

Check for 822P software updates and download as required.
Choose to begin update or schedule update.

● Connection fees do not apply to updates (including checking for updates, downloading and rewriting).
● Fully charge battery beforehand. Even if 🔋 appears, low battery message may appear. In this case, charge battery until Charging Indicator goes out.
● Select a place where signal is strong and stable.
● Do not remove battery during the update. Update will fail.
● Other functions are not available during Software Update.
● The update may take some time.

Main Menu ▶ Tools ▶ Software Update ▶ Start Update

1 Follow onscreen instructions

After download is complete, 822P automatically turns off and restarts before Software Update begins. (This process takes approximately 20 seconds.)

After Software Update is complete, 822P automatically turns off and restarts before information appears for successful update. (This process takes approximately 30 seconds.)
When Already Updated

No update required confirmation appears.
Press 📧 **[OK]** and proceed with use of 822P.
Update Results

Software Update ▶ **Information**

Scheduled Update

Follow onscreen instructions for setup.
Confirmation appears at scheduled
update time. Press 🔘 or wait ten
seconds for update to start.

● Software Update will not start while
822P is in use. Continuing handset
usage for ten minutes or more cancels
Scheduled Update.
Note
● Software Update failure may disable 822P. Contact
SoftBank Customer Center, Customer Assistance
(ᴄ� P.17-42).

● Software Update does not affect Phone Book entries,
files saved in Data Folder or other content, but it is
recommended that you create a backup, as appropriate,
of any important information and data (note that some
files cannot be copied).

● SoftBank is not liable for damages resulting from loss of
data, information, etc.

● Update may temporarily cancel Keyguard.

● Alarm tone does not sound during update.
