■ In PIN/PIN2, PUK/PUK2 entry window

Emergency Positioning Request

When an emergency call is made from a mobile phone, location is reported to first response agencies such as the police.

● Location information may be inaccurate due to location or signal conditions. Describe location or nearby landmarks.
● Base Station Positioning System is accurate within 100 meters to 10 kilometers. Location information from distant base stations may be inaccurate.
● Function available where first response agencies have completed system installation.
● Dialing 184 before 110, 118 or 119, cancels location report. However, first responders may obtain location information for immediate and serious threats to life.
● Not available for international roaming.
● Requires no separate subscription or transmission fees.

Note

● Emergency numbers may not be dialable outside Japan depending on the network available or handset settings.
