S! Applications & Widgets

Using S! Applications

Try out the preloaded S! Applications or download and use 944SH-compatible S! Applications, including games.

- Refer to the S! Application's help menu or the source Internet site, etc. for operational instructions.
- Subscription to Keitai Wi-Fi is required to use S! Applications over Wi-Fi.

Remote Control (Familink Remote)

- Use *ファミリンクリモコン* for *AQUOS* S! Application (Japanese) to control a TV, VCR, etc. via infrared.

- 1 → **S! Appli** →
- 2 **S! Appli Library** →

S! Appli Library

- 3 **Select application** →

Network S! Applications

- A message appears indicating that Internet connection is required. Follow onscreen instructions.

Incoming Calls

- Incoming calls automatically pause S! Application.

Exiting S! Applications

- 1

- 2 **End** →

Pausing S! Applications

In , **Suspend** →

Resuming S! Applications

→ **Resume** →

- Select **Cancel** to open Main Menu and keep the S! Application paused. (Additional function activation may be disabled depending on the S! Application.)
- Select **End** to exit the S! Application.

Advanced

- Downloading S! Applications ● Adjusting S! Application sound volume ● Canceling surround effect ● Setting handset responses to incoming transmissions ● Setting S! Application to activate in Standby ● Setting Permissions ● Opening properties ● Moving S! Applications to Memory Card
- Changing S! Application settings ● Deleting S! Applications ● Restoring default S! Application settings ● Restoring default S! Appli Library
- Synchronizing Memory Card S! Applications with 944SH ● Opening Java™ license information (P.10-6 - 10-7)

Customizing Standby Display (Japanese)

Paste various widgets (applications) to Standby to access/activate information/ functions immediately from Standby.

Widgets

S! Quick News &
S! Friend's Status Widget

Sub Display Widgets

- 944SH supports widgets designed for Sub Display; obtain and handle them like widgets for Standby display. For more information, see "Sub Display" in Chapter 2.
